Our vision

A leading force in collaboration for better health

Previous Patient Consumer Committee

- 2009-2011
- 12 patient organisations and 4 meeting a year
- Aim: two way communication, increase information exchange, transparency and openness
- Fizzled out

Previous Committe Challenges

Decreasing number of attendants at the meetings lead to a survey

Reasons expressed:

- **One way communication**
- **The agenda not interesting enough**
- **Long journey to meetings**
- **Members own illness**

**Future plans – Invitation to dialogue/co-creation –
Continuously evaluate how can we do better. Meeting
plans in progress for early 2017**

Increasingly an expressed need for patient and consumer involvement

External factors

- **New legislation (Nya Patientlagen)**
- **New organisation (Rådet för styrning med kunskap)**
- **Health care -> design method**
- **Research -> Public and Patient Involvement**
- **Report highlights need (Vårdanalys)**
- **Other NCAs and EMA**

Patient/consumer involvement

The Narcolepsy example

Intense and mutually rewarding interaction from 2010 and onwards

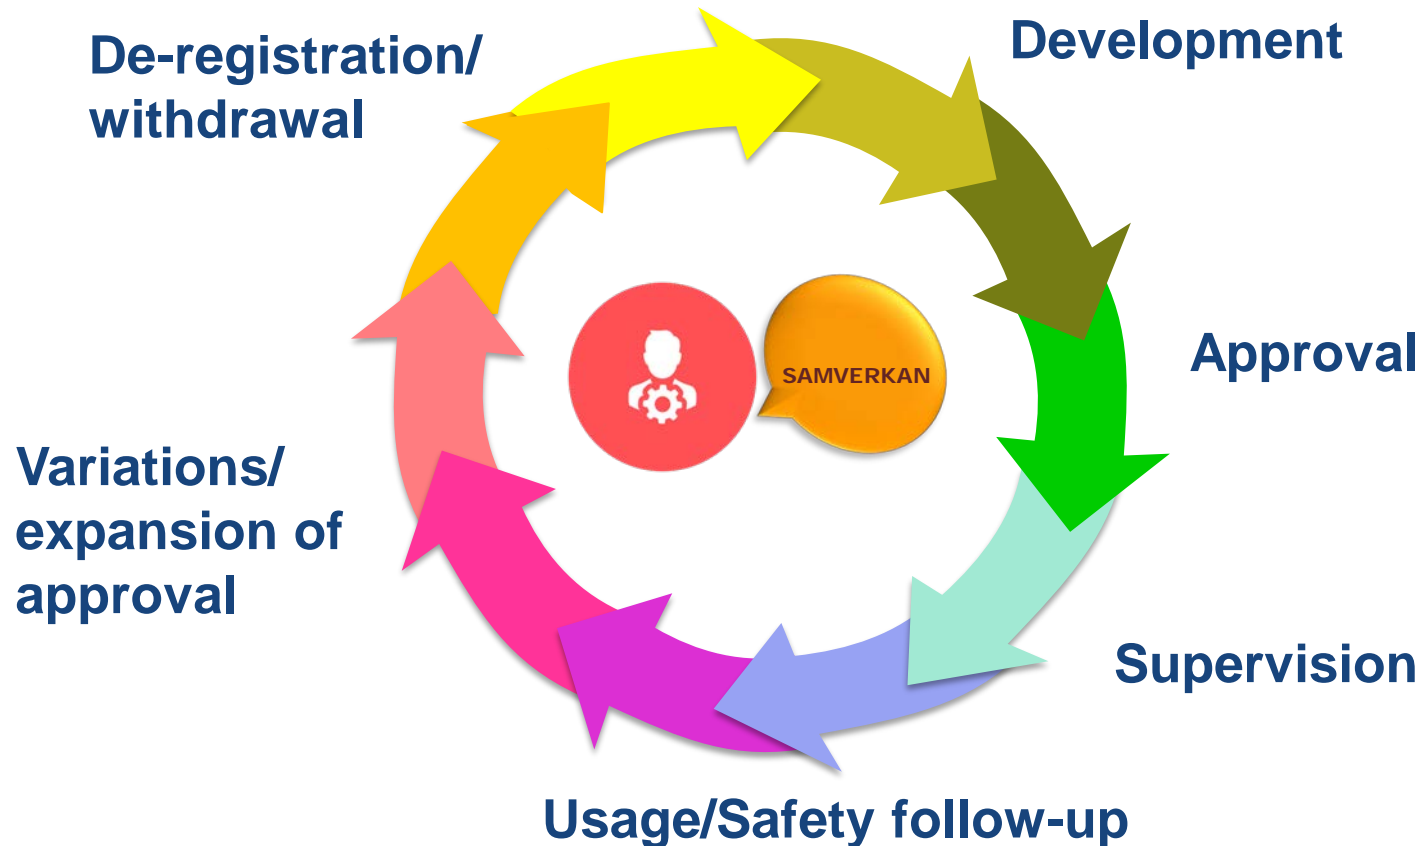

Parents association – narcolepsy in relation to vaccination with Pandemrix

- involvement in communication and research activities**
- several F2F-meetings**

Patient organisation – patient representative participated in the expert group which developed treatment guideline for narcolepsy in 2013

Life cycle – Medicinal products and Medical devices

Patient- and consumer interactions

Advisory council

Strategic documents

Co-creation/input projects

Safe ordering of medicinal products (eg online)

Service development eg external webb and support line

Business intelligence

Product specific

Risk-benefit evaluation

Readability

Adverse reactions and communication

Out of stock problems

Patient & consumer experiences and preferences (PROMS, PREMS etc)
